Rockville, MD 20857

Dear Commissioner,

I am writing today to request that you further accelerate FDA efforts to develop, validate and accept humane alternatives and to actively discourage animal-based testing by manufacturers of cosmetics and personal care products.

I also ask that you encourage manufacturers who do not use animal testing for their products to include such information on product labels.

Thank you for your time and consideration in these matters. The welfare of many animals are at stake.

Sincerely,

  
Brenda Neville
